**Bagage op
lichte fiets**

Bij de vele superlichte sportfietsen, die tegenwoordig in gebruik zijn, zijn de mogelijkheden om op de fiets bagage mee te nemen vaak te beperkt. Mede hierom, komen, toch wel lichte bagagedragers steeds meer in de mode en daarbij vooral ook dragers boven het voorwiel. Bij de constructie van de lichte fietsen wordt overigens met een eventuele bagagedrager steeds meer rekening gehouden. Onder meer met betrekking tot de wijze waarop de remmen worden gemonteerd.
